**DN SOLUTIONS**

# PUMA SERIES · 2100 · 2600 Y II

---

PUMA 2100 / 2600 Y II turning centers have been redesigned to deliver even more power and precision. A comprehensive line up of machines with chuck sizes from 8" to 12", integrated Y-axes and sub-spindles makes Puma 2100/2600Y II turning centers unrivalled and unbeatable in their performance.

PUMA 2100Y II

PUMA 2600SY II

### HIGH RIGIDITY AND PRECISION

The turning centres have a rigid and stable structure which helps eliminate vibrations and ensure high accuracy machining and improved process reliability.

### HIGH PERFORMANCE Y-AXIS FOR COMPLEX MACHINING

All machines in the range feature powerful, high torque spindles which, in conjunction with their Y-axis capabilities, enables them to machine high-precision, complex parts in fewer set ups.

### IMPROVED USER CONVENIENCE

The EZ work, with its hot keys and a range of user-friendly functions enable fast, trouble-free job set ups and efficient and reliable monitoring and management.

# MACHINING AREA

Model	Unit	Max. Turning diameter	Max. Turning length	Travel distance (Z-axis)
PUMA 2100Y / SY II	mm (inch)	406 (16.0)	520 (20.5)	590 (23.2)
PUMA 2100LY / LSY II	mm (inch)		760 (29.9)	830 (32.7)
PUMA 2600Y / SY II	mm (inch)	376 (14.8)	760 (29.9)	830 (32.7)
PUMA 2600LY / LSY II	mm (inch)		1280 (50.4)	1350 (53.1)
PUMA 2600YB / SYB II	mm (inch)		725 (28.5)	830 (32.7)
PUMA 2600LYB / LSYB II	mm (inch)		1245 (49.0)	1350 (53.1)

## High performance Y-axis for complex machining

Box guideways, applied to all axes, increase rigidity, reduce vibration and ensure powerful and precise machining. The Y-axis enables complex highly accurate shapes and features to be machined quickly and reliably.

### Y-axis milling

A wide variety of multi-axis milling operations can be achieved using the Y-axis.

### Y1/Y2-axis stroke

PUMA 2100 / 2600Y II series

**105 (±52.5) mm**  
4.1(±2.1) inch

# SPINDLE

The high-power/high-torque motor spindle enables high precision and heavy-duty cutting operations to be performed...ensuring improved productivity.

## A durable spindle for stable, heavy-duty cutting operations

An enhanced durable spindle featuring redesigned bearings provides increased rigidity.

Model	Driven type	Max. speed r/ min	Max. power kW (Hp)	Max. torque N · m (ft-lbs)
PUMA 2100Y /SY II series	Built-in	5000	22 (29.5)	358 (264.2)
PUMA 2600SY/LSY II series	Built-in	4000	22 (29.5)	599 (442.1)
PUMA 2600YB /SYB II series	Belt	2800	22 (29.5)	1123 (828.8)

## Sub-spindle

The sub-spindle function allows the backends of components to be machined in a single setup.

Model	Driven type	Max. speed r/ min	Max. power kW (Hp)	Max. torque N · m (ft-lbs)
PUMA 2100SY II /LSY II series	6" Built-in	6000 /	15	134
PUMA 2600SY /LSY II series	8" Built-in <small>OPTION</small>	5000 <small>OPTION</small>	20.1	98.9
PUMA 2600SYB /LSYB II series	6" Belt*	4500	7.5 (10.1)	85 (62.7)

## Improved precision from a highly rigid design

Compared to previous model  
Continuous machining accuracy

**40% Improved**

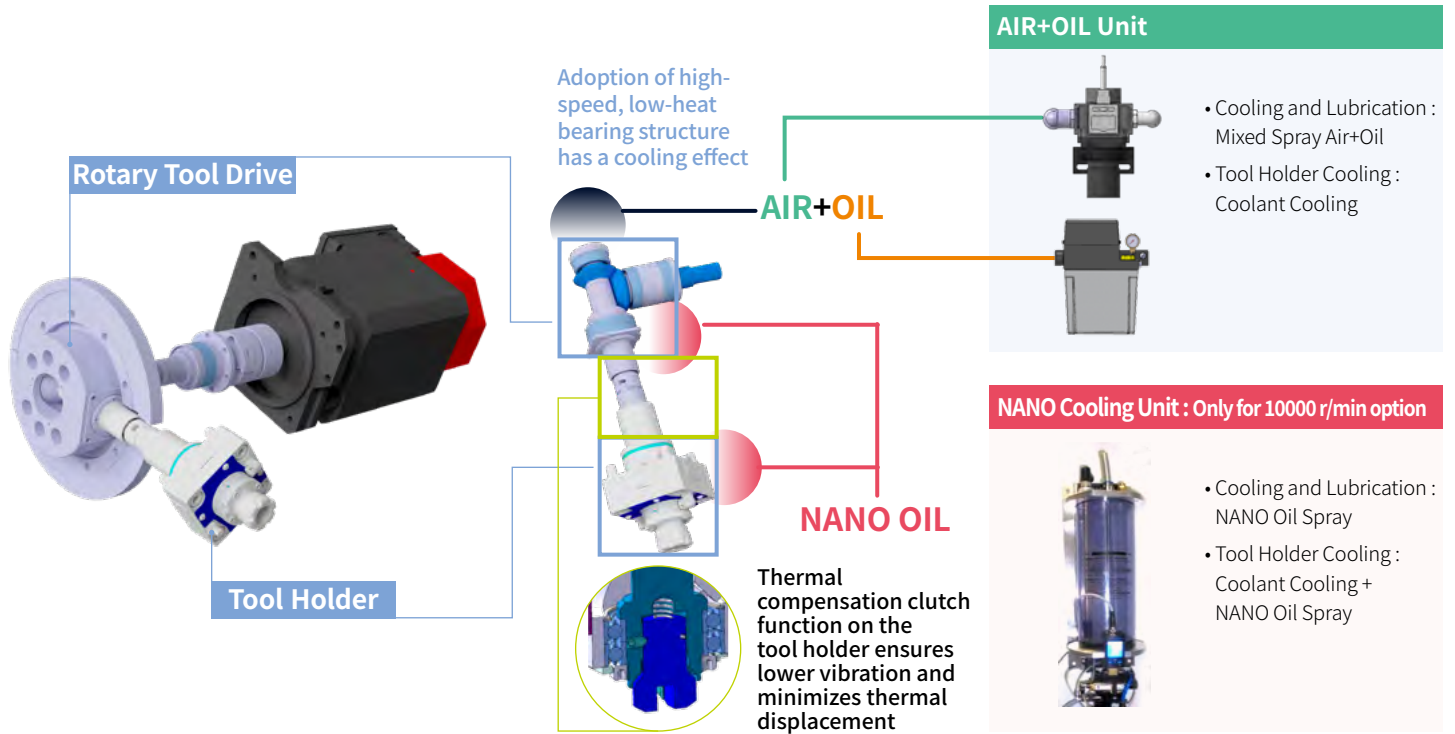

**Higher C-axis accuracy**

# TURRET

Turret rotation is controlled by a servo-motor that ensures fast and reliable tool selection. DN Solutions's unique BMT turret design is used on M and Y specification models to enhance heavy-duty milling performance.

## New rotary tool drive for greater stability and higher accuracy

The new rotary tool drive with air/oil cooling, low-heat bearings and a clutch function with thermal compensation minimizes thermal displacement and maintains high-precision machining performance even during long periods of operation. Also, when using the 10,000 r/min high-speed milling function (option), both the rotary tool drive and the tool holder are simultaneously cooled via an additional 'Nano cooling' function.

# TAILSTOCK

A high rigidity hydraulic tailstock clamped to the bed slideway provides stability and support for long workpieces.

## Tailstock type

- Manual
- Programmable
- Servo-driven

### Servo-driven tailstock

The servo-driven tailstock makes set-ups faster and easier to complete. The operator inputs the correct M-code information into the control and the tailstock moves to its correct position automatically, via linear motion control of the servo motor and the ball-screw. No manual adjustments are required.

### Tailstock EZ function

With the programmable tailstock, the Z-axis position is recorded automatically as the clamped position of tailstock.

Special option	70 bar*	7.5kW x 7.0 Mpa x 29L/min	7.5kW x 7.0 Mpa x 20L/min

\* Recommend using coolant chiller.

Fire Safety Precautions | There is a high risk of fire when using non-water-soluble cutting fluids, processing flammable materials, neglecting the controlled and careful use of coolants and modifying the machine without the consent of the manufacturer. Always check the SAFETY GUIDELINES carefully before using the machine.

# PERIPHERAL EQUIPMENT

## Chip Conveyor OPTION

Long

Short

Needle

Sludge

### Hinged belt type\*

The most common type of chip conveyor. Appropriate for use with steels generating chips of 30mm or more in length.

### Drum filter type\*\*

Chip conveyor with integrated magnet: Appropriate for cast iron workpieces generating fine chips.

Chip conveyor type	Material	Carbon steel			Cast iron		Aluminium		
		Long	Short	Needle	Short	Sludge	Long	Short	Needle
Hinged belt type*		○	△	X	△	X	○	△	X
Drum filter type**	Hinged type	○	△	X	△	X	○	△	X
	Scraper	X	○	△	○	△	X	○	△

○ : Suitable, △ : Possible, X : Not suitable

## Coolant Chiller (recommended) OPTION

Coolant chiller is highly recommended to prevent temperature increases and to minimize thermal deformation, when using a water-insoluble coolant or a high-pressure coolant system with power over 1.5 kW.

## Quick change CAPTO OPTION

The quick change tool system simplifies tool change operations. Recommended for users who need to change tools frequently or to reduce set-up times.

## Axis-tool number display

The axis and tool number display provides extra certainty and peace of mind that the correct axis has been selected (before moving to MPG manual mode), and confirmation of the tool (number) being used at any given time.

## Optional equipment OPTION

### COLLET CHUCK

### PART CATCHER

### TOOL SETTER

### OIL SKIMMER

### MIST COLLECTOR

### Easy-to-clean Coolant Tank

### SIGNAL TOWER

### COOLANT BLOWER

# DN SOLUTIONS FANUC i PLUS

DN Solutions Fanuc i Plus maximizes customer productivity and convenience.

## 15" Screen + New OP

DN Solutions Fanuc i Plus' operation panel enhances operating convenience by incorporating common-design buttons and layout. It features a Qwerty keyboard for fast and easy data input and operation.

### DN Solutions Fanuc i Plus

- 15-inch color display
- Intuitive and user-friendly design

### USB and PCMCIA card QWERTY keyboard

- EZ-Guide i standard
- Ergonomic operator panel
- 2MB Memory
- Hot keys

### iHMI touchscreen OPTION

iHMI provides an intuitive interface that uses a touchscreen for quick and easy operation.

### Range of applications

Providing various applications related to planning, machining, improvement and utility, for customer convenience.

### SKETCH-TURN OPTION

#### DN Solutions Conversational programming software for PC

- Easy to learn for beginners
- Time savings in programming
- Reduce processing cycle time

# DN SOLUTIONS FANUC i PLUS

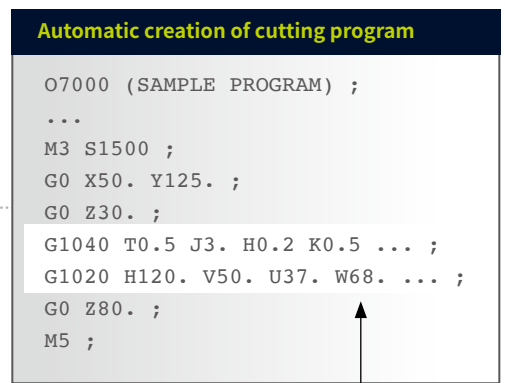

## EZ-Guide i

Using the DN Solutions EZ-Guide i, users can create a cutting program for any desired shape, including patterns, by entering just the dimensions.

Example programming : Cutting shape

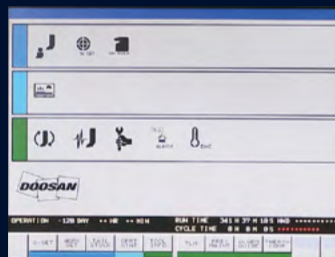

Enter the dimensions of the shape

A cutting program is automatically created with the entered values.

## EZ work

DN Solutions's EZ work supports the user with functions relating to tool data, error diagnostics, set up and machine monitoring.

Select menu screen

## Convenient set up for peripheral equipment

Helps tool setter guide, work setting, tailstock setting, and other measurement and parameter control to reduce setting-up time and facilitates operation.

## Screen for monitoring the machine and operating conditions

The screen provides a complete view of machine operation. Information on the feed system position, offset, feedrate and spindle speed, tool life and count in an easy-to-view screen.

## Management Convenience Screen

Helps to prepare tools and provides for visual information on alarms to reduce maintenance time.

# CONVENIENT OPERATION

## SIEMENS S828D

### 15.inch display + New OP

Siemens 828D' operation panel enhances operating convenience by incorporating common-design buttons and layout. It features a Qwerty keyboard for fast and easy data input and operation.

- 15.6 inch display
- USB (standard)
- QWERTY keyboard

### Convenient conversational functionality

# RESPONDING TO CUSTOMERS ANYTIME, ANYWHERE

## DN Solutions Global Network

DN Solutions provides systems-based professional support services, before and after the machine tool sale, by responding quickly and efficiently to customers. By supplying spare parts, product training, field service and technical support, we provide the expert care, attention and assistance our customers expect from a market leader.

<b>Global sales and service support network</b>		<b>51</b>	<b>Technical centers</b> Technical center, Sales support, Service support, Parts support
<b>4</b>	<b>Corporations</b>	<b>200</b>	<b>Service posts</b>
<b>155</b>	<b>Dealer networks</b>	<b>3</b>	<b>Factories</b>

## CUSTOMER SUPPORT AND SERVICES

**We're there for you whenever you need us.**

We help our customers operate at maximum efficiency by providing them with a range of tried, tested and trusted services - from pre-sales consultancy to post-sales support.

### Field services

- On-site service
- Machine installation and testing
- Scheduled preventive maintenance
- Machine repair service

### Parts supply

- Supplying a wide range of original DN Solutions spare parts
- Parts repair service

### Training

- Programming, machine setup and operation
- Electrical and mechanical maintenance
- Applications engineering

### Technical support

- Supports machining methods and technology
- Responds to technical queries
- Provides technical consultancy
