

MULTI-PURPOSE VERTICAL MACHINING CENTER

VCF

850 II • 850L II • 850SR II • 850LSR II

DN SOLUTIONS

VCF 850 II SERIES

850 II · 850L II · 850SR II · 850LSR II

VCF 850 II series is new, multi-purpose vertical machining centers suitable for a wide range of machining applications. The upgraded series feature high-rigidity and durable B-axes for improved cutting performance and machining flexibility. VCF 850 II moving-column machines are equipped with 3 metre X-axes and their performance and productivity can be increased through a range of options that include rotary tables and center partitions.

Equipped with large X-axis travels and a range of high-productivity and flexible options, VCF machines deliver unrivalled performance and versatility.

HIGH PERFORMANCE & HIGH RIGIDITY ON B-AXIS

- The high-rigidity Roller Gear Cam structure on the B-axis provides excellent cutting performance and durability.

INCREASED PRODUCTIVITY THROUGH A WIDE RANGE OF OPTIONS

- Availability of rotary tables, center partitions and pick-up magazines help manufacturers significantly increase operational efficiencies.

MULTI-PURPOSE MACHINE TOOL CAPABLE OF 3- TO 5- AXIS SIMULTANEOUS MACHINING

- Simultaneous machining operations from 3- to 5-axes (with X-axis of 2 m or 3 m) are symptomatic of a real multi-purpose machine.

BASIC STRUCTURE

The machine's fixed table, moving-column structure combined with its compact footprint and large X axis, appeal to a wide range of manufacturers.

Multi-purpose vertical machining center

VCF 850 II machines are multi-functional machine tools with a new design concept. Everything from small precision parts to large workpieces with complex shapes and features, can be manufactured on these machines.

VCF 850 / L II

VCF 850SR / LSR II

Machine foundation*

Anchoring is recommended to provide a stable foundation and ensure high accuracy machining in the short, medium and long term. Anchor bolts and other foundation equipment and parts are supplied as standard items.

* Please consult with DN Solutions sales technicians regarding all foundation-related issues.

AXIS SYSTEM

The linear axes are equipped with roller LM guideways for increased rigidity, and a cooling system supplied as standard helps to minimize thermal displacement.

Stable and smooth axes

Roller-type LM guideways and high-rigidity coupling help deliver outstanding long-term accuracies, repeatability's and unrivalled performance.

Description	Unit	X	Y	Z
Travel distance	mm (inch)	3000 {2000*} (118.1 {78.7}*)	850 (33.5)	800 (31.5)
Type			Roller type	
LMG structure	rows	3	2	2
Rapid traverse	m/min (ipm)		40 (1574.8)	

*VCF 850 II

Cooling system for high accuracy*

The temperature of the ballscrew nuts and bearing housings are maintained at optimal levels by a cooling system designed to minimize thermal error and maintain the rigidity and integrity of the feed system.

* All machines and all axes

SPINDLE INFORMATION

Built-in spindles deliver outstanding reliability. They are cooled to minimize thermal error and to guarantee excellent accuracy during long periods of operation.

Built-in spindle

Delivers the highest productivity and reliability at the lowest noise and vibration levels.

Max. spindle speed

ROTARY TABLE

Mounted or integrated rotary tables are available to suit customers' application requirements.

Two types of rotary table provide the ultimate in customer choice and satisfaction option

Top-mounted attachable / detachable* rotary tables are available with either a horizontal or a vertical configuration.

Workpieces with a maximum diameter of $\varnothing 1050\text{mm}$ can be accommodated on the integrated tables.

Type	Rotary table diameter mm (inch)	Max. work diameter mm (inch)	Rapid r/min	Load capacity kg (lb)	
Mounted	$\varnothing 500$ (19.7)	$\varnothing 730$ (28.7)	30	Vertical	600 (1322.8)
				Horizontal**	300 (661.4)
Integrated	$\varnothing 800$ (31.5)	$\varnothing 1050$ (41.3)	25	1200 (2645.5)	

* Please consult us about the attachable/detachable configuration. ** For the rotary table only (excluding support).

MAGAZINE

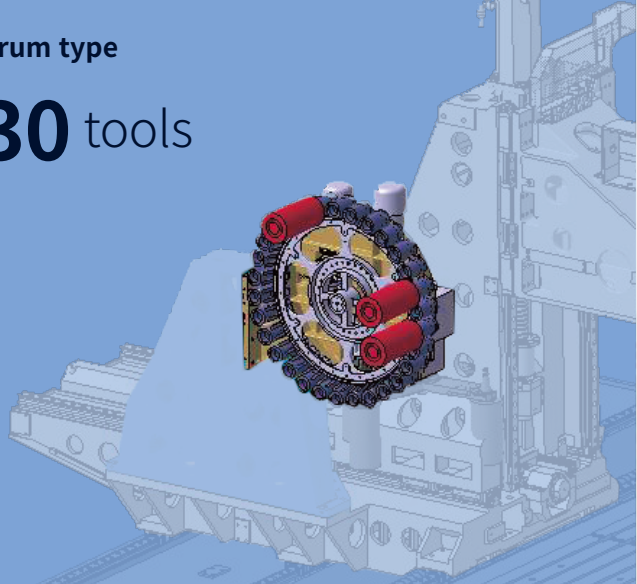

Magazine reliability is guaranteed by the integration of servo motors. Tool storage capacity can be extended up to 60 tools.

Tool magazine

The reliability and high-performance of the ATC is assured through the integration of a servo motor.

Drum type

30 tools

Chain type option

60 tools

● Standard ○ Optional × Not applicable

*When using a semi-synthetic type or synthetic type, contact our sales representative or service center in advance.

PERIPHERAL EQUIPMENT

Center partition option

Delivers machining efficiency equivalent to having two tables, thereby maximizing productivity.

Productivity is maximized by partitioning the table into two working areas.

A area
- machining

B area
- loading / unloading work

Coolant tank option

The new coolant tank delivers improved coolant recovery rates and a longer filter cleaning cycle.

Intelligent kinematic compensation for 5-axis machining

For high-accuracy 5-axis machining, the Intelligent Kinematic Compensation function is recommended. This function minimizes errors in complex 5-axis machining applications by maintaining the tool point in the correct position relative to the workpiece. In order to use this function, the following optional items are required

Recommended optional items

Software

FANUC NC: DCP-i (Developed by DN Solutions)

Heidenhain NC: Kinematic opt

Receiver

Recommended Option

Touch probe

Recommended Option

Datum ball

APPLICATIONS

A wide range of different machining and production solutions are available to customers.

VCF 850 / L II

A range of flexible, high-productivity solutions are available to customers using the center position and the machines' 3-axis capabilities.

3-axes standard machine

Small items, mass production

Multi-functional application of table by center partitioning

Long work piece machining as one piece

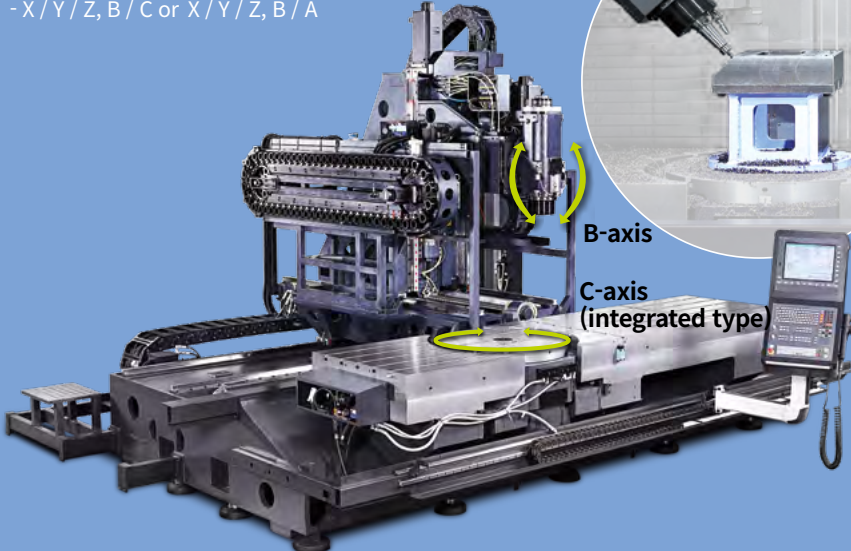

3-axes standard machining

VCF 850SR / LSR II

A range of flexible, high-productivity solutions are available to customers using the center position, and the machines' 4- and 5-axis simultaneous machining capabilities.

5 axes machine

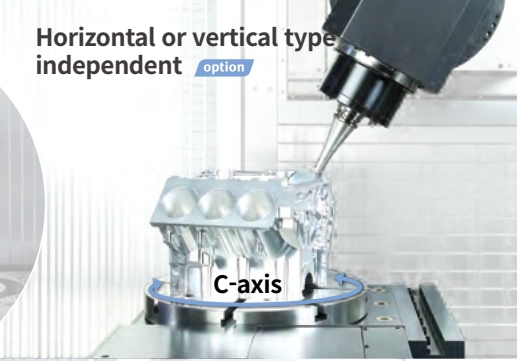

- 4 + 1 axes
- 5 axes simultaneously
- X/Y/Z, B/C or X/Y/Z, B/A

B-axis

C-axis (integrated type)

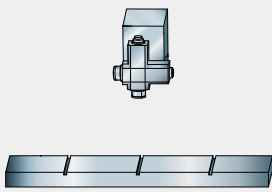

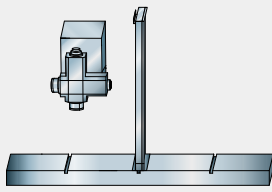

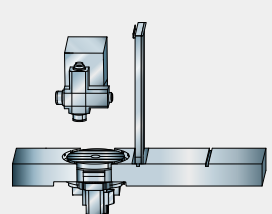

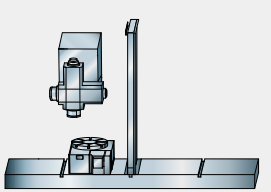

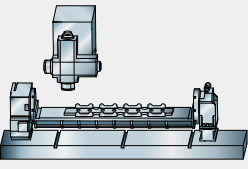

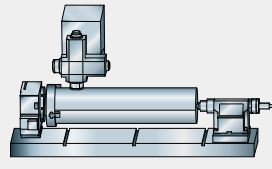

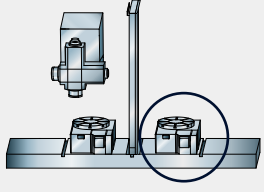

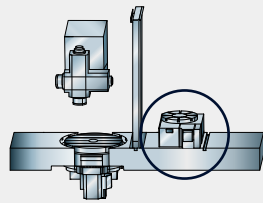

Horizontal or vertical type independent option

FANUC 31i PLUS

Fanuc 31i Plus maximizes customer productivity and convenience.

15" Touch screen + New OP

DN Solutions Fanuc 31iB/B5 Plus' operation panel enhances operating convenience by incorporating common-design buttons and layout. It features a Qwerty keyboard for fast and easy data input and operation.

Fanuc 31i Plus

- 15-inch color display
- Intuitive and user-friendly design

USB and PCMCIA card QWERTY keyboard

- EZ-Guide i standard
- Ergonomic operator panel
- 4MB Memory
- Hot keys
- Enhance AICC BLOCK
- Touch pen provided as standard

iHMI touchscreen

iHMI provides an intuitive interface that uses a touchscreen for quick and easy operation.

Range of applications

Providing various applications related to planning, machining, improvement and utility, for customer convenience.

EZ WORK

The software developed by DN Solutions's own technology provides numerous functions designed for convenient operation.

EZ work

The EZ work package delivers speed and efficiency. This menu-driven innovation not only helps customers reduce setup times, but also simplifies common tasks and procedures, reducing the potential for errors. EZ work reduces operating time, protects machinery, enhances quality and speeds up maintenance interventions.

Thermal Compensation

A function to maintain high-precision machining quality by analyzing and correcting the amount of thermal displacement of a structure through a temperature sensor

M/G-Code List

Functional description of M code and G code

Tool Management

Function to manage tool information [Tool information / Tool No. / Tool condition (normal, large diameter, worn / damaged, used for the rst time, manual) / Tool name]

Operation Rate

Machine operation history management function by date based on load

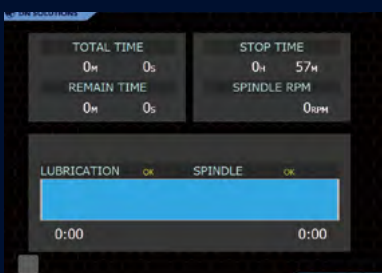

Adaptive Feed Control

Function to control feedrate so that the cutting can be carried out at a constant load

IKC (DCP-I)

The function to compensate the position of the workpiece and the tool tip to be constant regardless of the rotation of the rotating shaft error

Spindle Warm Up

A function that assists spindle warm-up for spindle life when the spindle has not been used for a certain period of time

ATC Recovery

Function to view detailed info with recommended actions and to perform step-by-step operation manually (when an alarm is triggered during an ATC operation)

Addition of Optional Block Skip

In addition to the OPTIONAL BLOCK SKIP of the operation panel, the function to skip a specific block selected in the machining program

CONVENIENT OPERATION

SIEMENS 840D

15.6" screen + New operation panel

The newly-designed operation panel improves the customer convenience by incorporating and using common-design buttons and layouts, and includes the familiar QWERTY keyboard for fast and easy operation.

- 15.6" display
- 10MB high capacity user memory
- USB & ethernet (standard)
- QWERTY keyboard (standard)
- High-speed calculation and simulation can be fulfilled by improved processor functionality

WHY 5-AXIS MACHINING?

Single setup efficiency

5-axis machining allows you to approach the workpiece from all angles, with complete access to five sides of the part in a single setup. This reduces the overall number of part setups compared to traditional machining, which minimizes machine downtime and maximizes chip making time.

Improved part accuracy

When making parts with multi-sided features using traditional 3-axis machining, multiple part setups are required. This means new inaccuracies can arise each time the workpiece is repositioned. 5-axis machining eliminates stacked tolerances and improves overall part dimensional accuracy.

Extended machine shop capability

DN Solutions 5-axis machines open up new doors for your machine shop. The increased efficiency will make you instantly more competitive, and full 5-axis machining capabilities give you the opportunity to quote on jobs that previously weren't possible. So, what are you going to make today?

“Compared with similar machines from Japan or Europe, DN Solutions has the same level of precision and quality at a better value for money.”

– *OMGM Group, Italy*

“Our DN Solutions 5-axis is making complex, high precision parts for aerospace and defense. Cycle times have been reduced dramatically.”

– *Aerotech Precision Manufacturing, Great Britain*

The DN Solutions promise, MACHINE GREATNESS, has two important meanings. The first is simple: DN Solutions makes great machines. The second is a challenge to our end-users. With a product line that is this comprehensive, accurate and reliable, we equip our customers to machine greatness. The big question: **Why should you choose DN Solutions over other options?**

Here's why...

**MACHINE
GREATNESS™**

WHAT YOU MAKE AND HOW YOU MAKE IT MATTERS—SO MAKE IT
GREAT WITH DN SOLUTIONS.

UNBEATABLE MACHINES

You won't find a more comprehensive range or a better combination of value, performance and reliability anywhere else.

ROBUST PRODUCT LINE

We offer an impressive range of machine models and hundreds of configurations. Whatever your machining needs and requirements, there's a DN Solutions for you.

READILY AVAILABLE - ANYWHERE IN THE WORLD

Machining centres (including 5-axis machines), lathes, multi-tasking turning centres and mill-turn machines, and horizontal borers with best-in-class specifications are all available...ready to install.

EXPERT SERVICE

Our dedicated, experienced and knowledgeable team is totally committed to improving your productivity, growth and success.

RESPONDING TO CUSTOMERS ANYTIME, ANYWHERE

DN Solutions Global Network

DN Solutions provides systems-based professional support services, before and after the machine tool sale, by responding quickly and efficiently to customers. By supplying spare parts, product training, field service and technical support, we provide the expert care, attention and assistance our customers expect from a market leader.

Global sales and service support network		51	Technical centers Technical center, Sales support, Service support, Parts support
4	Corporations	200	Service posts
155	Dealer networks	3	Factories

CUSTOMER SUPPORT AND SERVICES

We're there for you whenever you need us.

We help our customers operate at maximum efficiency by providing them with a range of tried, tested and trusted services - from pre-sales consultancy to post-sales support.

Field services

- On-site service
- Machine installation and testing
- Scheduled preventive maintenance
- Machine repair service

Parts supply

- Supplying a wide range of original DN Solutions spare parts
- Parts repair service

Training

- Programming, machine setup and operation
- Electrical and mechanical maintenance
- Applications engineering

Technical support

- Supports machining methods and technology
- Responds to technical queries
- Provides technical consultancy
