

HIGH PERFORMANCE VERTICAL MACHINING CENTER FOR DIE / MOLD MACHINE

5400 • 6500

VM 5400 · 6500

The efficiency and competitiveness achieved by the user is optimised by the core features which are standard on the machine. These include face / taper contact spindle nose (BBT40), effective spindle cooling system and air blower for chip removal when dry cutting. These features contribute to the machine's capability to produce high quality dies and moulds.

HIGH RIGIDITY STRUCTURE

 The arch style minimizes deformation during heavy duty cutting and maintains stable precision levels.

HI-SPEED, HI-PRECISION SPINDLE

 High torque 15.6 kW serial spindle motor ensures stable precision levels in machining metal molds.

CONVENIENCE IMPROVEMENTS FOR OPERATOR

 Various chip handling devices are provided for enhanced user convenience.

BASIC STRUCTURE

In addition to higher durability and an excellent vibration absorption feature, the static stiffness and dynamic stiffness have been improved by 30%, thanks to the Finite Element Method (EFM).

High Rigidity

The highly-rigid body found on the VM series enables exceptionally heavy-duty machining.

High Rigidity Design

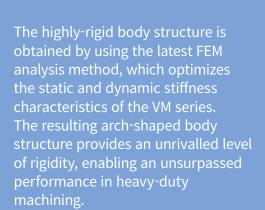

High Rigidity construction is achieved by 3D computer simulation.

Static rigidity

The high rigidity structure of VM series has raised the static rigidity up by 30% more than previous model with no weak point through FEM analysis.

Dynamic rigidity

Improving the frequency response and the damping ability of vibration makes it possible to increase the high eigenfrequency 30% up on the previous model.

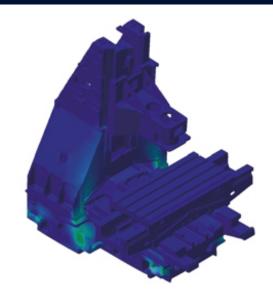

Broader Box Guideways

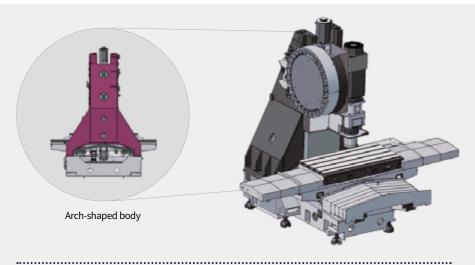

Compared to the previous models, the broader box guideways greatly improve the machine's dynamic characteristics.

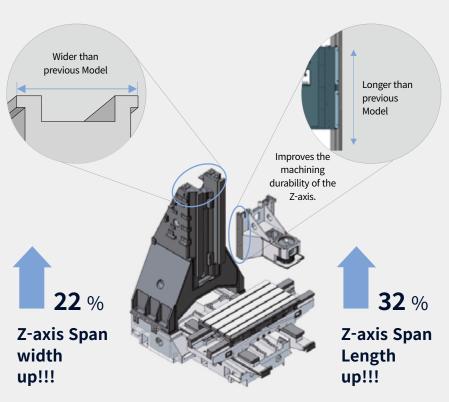

Scraping of surface

The sliding surface of each guideway is bonded with Rulon® 142 to reduce friction, then hand scraped for a perfect fit.

SPINDLE

The unsurpassed quality and accuracy of the VM series achieves world-class performance in the machining of die & mold products.

Spindle motor power

15.6 kW 20.9 Hp

Max. spindle speed

12000 r/min

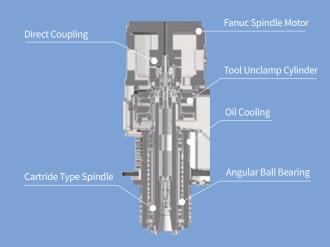

High Speed / Precision Built-in Spindle

Since the main spindle is supported by 4 rows of P4 level high precision bearings, it maintains stable precision under high speed cutting operation for long periods. Moreover, the high torque 15.6 kW (20.9 Hp) direct connection type main spindle motor is equipped for high speed mold processing.

Direct-coupled Spindle

Minimization of direct-connectiontype mair spindle thermal deformation

Low friction and heat generation of main spindle

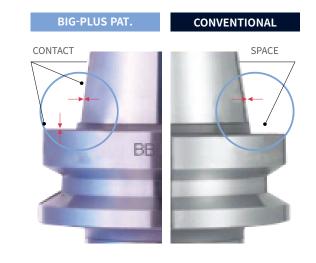

Main spindle head cooling system

Actualization of low noise in accordance with adoption of special grease lubrication for main spindle cooling device and dramatic reduction of compressed air consumption allows minimization of main spindle thermal deformation.

Face / taper contact spindle (BBT40)

Common utilization of BT40 Tool and 2-face binding tool (BIG PLUS)

MACHINING PERFORMANCE

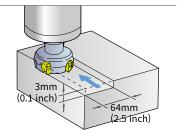

Cutting Performance

The VM series provides high machining performance in various cutting processes.

VM 5400

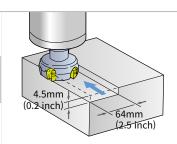

Face mill (ø80mm) Carbon steel (SM45C)

Machining rate	Spindle speed	Feedrate
(cm³/min(in³/min))	(r/min)	(mm/min (ipm))
427 (16.8)	750	2226 (87.6)

(cm³/min(in³/min))	(r/min)	(mm/min (ipm))
1728 (68.0)	6000	9000 (354.3)

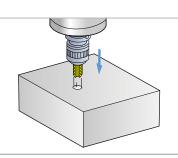

Tap BT40 Carbon steel (SM45C)

Tool	Spindle speed	Feedrate
(mm)	(r/min)	(mm/min (ipm))
M30 x P3.5	220	770 (30.3)

Tap BT40 Gray Casting (GC25)

Tool	Spindle speed	Feedrate
(mm)	(r/min)	(mm/min (ipm))
M30 x P4.0	200	800 (31.5)

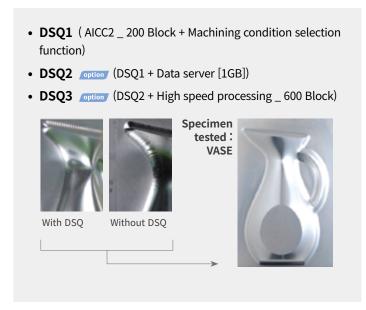

^{*} The results, indicated in this catalogue are provides as example. They may not be obtained due to differences in cutting conditions and environmental conditions during measurement.

OPTIMIZED TOOL PROCESSING SOLUTION

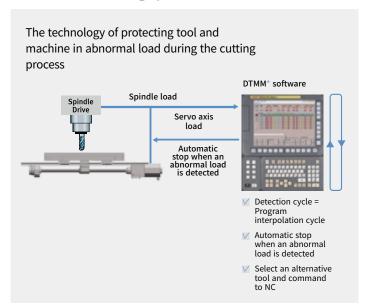

Superior surface finishes and machining accuracy are achieved through using standard processing solutions such as high-speed / high - precision contour control and thermal displacement compensation.

High speed / high precision contour control

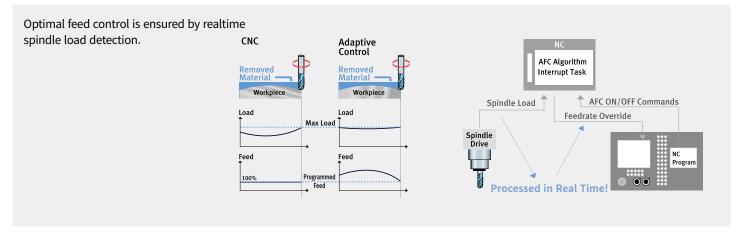

*DSQ: DN Solutions Super Quality

Tool load monitoring system (DTMM*)

*DTMM: DN Solutions Tool load Monitoring for Machining Centers

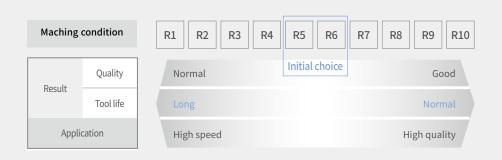

The optimal feed control (DAFC*)

*DAFC: DN Solutions Adaptive Feedrate Control

Machining condition selection function

- It is possible to change machining condition in 10 steps by using R code at the program.
- Improving productivity (high speed at rough machining, high precision at precision machining)
- NC parameter such as maximum feed and accelation time constant can be set automatically.

DIE & MOLD SOLUTION

The VM Series provides ultra-precise machining capability using high speed / precision contour feed control and the optimum machine stability.

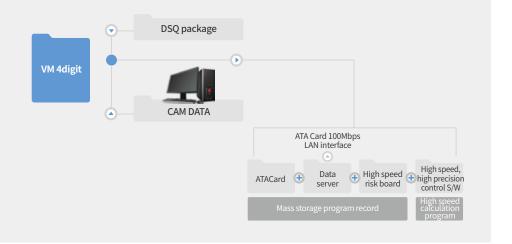

High speed / Precision contour control

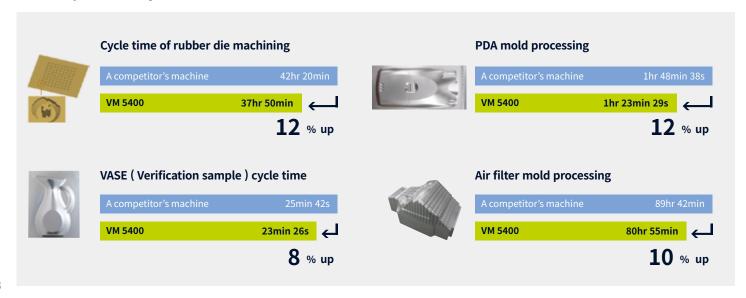

Data Server & Risc Board

With a mounted mass storage data server and CPU, it is possible for high end processing of mass storage programs.

DSQ package upgrades productivity and mold processing quality with individual tuning of machinery features, high speed processing by mass storage programs and enhanced superb command following capacity.

The comparison of cycle time (actual result)

STANDARD | OPTIONAL SPECIFICATIONS

A range of options is available to suit individual requirements.

FANUC 32i PLUS

Fanuc 32i Plus maximizes customer productivity and convenience.

15" Touch screen + New OP

DN Solutions Fanuc 32i Plus' operation panel enhances operating convenience by incorporating common-design buttons and layout. It features a Qwerty keyboard for fast and easy data input and operation.

Fanuc 32i Plus

- 15-inch color display
- Intuitive and user-friendly design

USB and PCMCIA card QWERTY keyboard

- EZ-Guide i standard
- Ergonimic operator panel
- 4MB Memory
- Hot keys
- Enhance AICC BLOCK
- Touch pen provided as standard

iHMI touchscreen

iHMI provides an intuitive interface that uses a touchscreen for quick and easy operation.

Range of applications

Providing various applications related to planning, machining, improvement and utility, for customer convenience.

EZ WORK

The software developed by DN Solutions features numerous functions designed for convenience and ease of operation.

EZ work

The EZ work delivers speed and efficiency. This menu-driven innovation not only helps customers reduce setup times, but also simplifies common tasks and procedures, reducing the potential for errors. EZ work reduces operating time, protects machinery, enhances quality and speeds up maintenance interventions.

Tool Load Monitor

Function to automatically monitor tool load (Dierent loads can be set for one tool according to M700 ~ M704)

M/G-Code List

Functional description of M code and G code

Tool Management

Function to manage tool information [Tool information / Tool No. / Tool condition (normal, large diameter, worn / damaged, used for the rst time, manual) / Tool name]

Operation Rate

Machine operation history management function by date based on load

Adaptive Feed Control

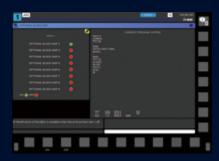

Spindle Warm Up

A function that assists spindle warm-up for spindle life when the spindle has not been used for a certain period of time

ATC Recovery

Function to view detailed info with recommended actions and to perform step-by-step operation manually (when an alarm is triggered during an ATC operation)

Addition of Optional Block Skip

In addition to the OPTIONAL BLOCK SKIP of the operation panel, the function to skip a specific block selected in the machining program

Easy operation

Operator convenience and work efficiency have been improved with adoption of various convenient control functions and ergonomic design.

Operating console

1. 10.4" Color TFT LCD Monitor as Standard

The wide screen displays more useful infromation for the operator. DN Solutions's customized pages make setting up, operating, and machine conditionmonitoring easier.

2. Pentium Board is standard.

3. Portable MPG

It makes workpiece setting easier for the operator

4. Easier ATC operation and maintenance.

It gives much easier operation and maintenance for ATC.

Magazine: CW Magazine: CCW

5. PCMCIA Card

6. Embedded Ethernet / RS-232C

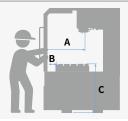

7. Swivelling Operating Console

The easy-to-use operation panel can swivel 0-90°

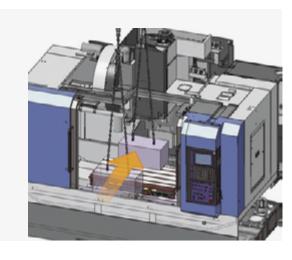

Accessibility

It is designed for easy install the workpiece by improving the operator's accessibility.

CONVENIENT OPERATION

HEIDENHAIN TNC640

Superior hardware specifications

The TNC 640 features optimized motion control, short block processing times and special control strategies. Together with its uniform digital design and its integrated digital drive control (including inverters), it enables you to achieve high machining speeds and the best possible contour accuracy.

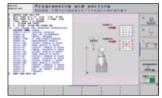

- 15.6" display
- 21GB Storage memory
- 500 look ahead blocks
- High user convenience with folder structure data management

Conversational convenient function

Data are controlled in the folder structure; convenient communication via USB devices

KinematicOpt & KinematicComp option (Touch probe cycle for automatic measurement)

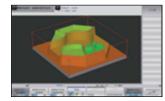

Collision protection system

Adaptive feed control option

Various built-in pattern cycles for a wider scope of application (Software standard)

Graphic simulation

RESPONDING TO CUSTOMERS ANYTIME, ANYWHERE

DN Solutions Global Network

DN Solutions provides systems-based professional support services, before and after the machine tool sale, by responding quickly and efficiently to customers. By supplying spare parts, product training, field service and technical support, we provide the expert care, attention and assistance our customers expect from a market leader.

Global sales and service support network		51	Technical centers Technical center, Sales support, Service support, Parts support
